SUMMARY

Frontend Developer with hands-on experience building scalable web applications using React.js, TypeScript, Tailwind CSS, JavaScript, HTML, and CSS. Currently working as a Junior Software Developer Intern at VRNexGen Technologies, contributing to the development of VRXLEARN, a production-level Learning Management System (LMS) used by students, trainers, and administrators. Passionate about creating intuitive user experiences and continuously learning modern web technologies.

EXPERIENCE

Junior Software Developer Intern

Jan 2026 – Present

VRNexGen Technologies | Front-End Development

Worked on: VRXLEARN LMS

Live Application: <https://vrxlearn.vrnexgen1.com>

- Built and maintained features for VRXLEARN, a live LMS platform used by students, trainers, and admins — hosted on the official company server.
- Developed responsive UI components using React.js, TypeScript, and Tailwind CSS in a team-based Agile environment.
- Collaborated with the backend team (FastAPI) to integrate APIs and deliver end-to-end user flows.
- Technologies: HTML, CSS, JavaScript, React.js, TypeScript, Tailwind CSS

PROJECTS

Loan Fairness Auditor – Explainable AI & Fairness Analytics Platform

Stack: Python, Machine Learning, Scikit-learn, Fairlearn, FairCompass, Data Visualization

- Built a fairness auditing framework to detect and mitigate bias in automated loan approval decisions using machine learning.
- Trained an MLPClassifier model and analyzed prediction disparities across demographic groups using industry-standard fairness metrics.
- Improved fairness and transparency through bias mitigation techniques, interactive visual analytics, and subgroup performance exploration.

Bankist – Digital Banking Application

Stack: HTML, CSS, JavaScript, LocalStorage, DOM APIs

- Built a minimalist banking app simulating real-time operations: fund transfers, loan requests, account closure, and user registration via modal.
- Implemented auto-logout after 2 minutes of inactivity, input validation, and session isolation for secure UX.
- Live at: bankist-lilith.netlify.app

Mapty – Workout Tracker with Maps

Stack: HTML, CSS, JavaScript, Leaflet.js, Geolocation API, LocalStorage

- Developed a GPS-based fitness tracker that logs running and cycling workouts on an interactive Leaflet.js map.
- Applied OOP principles (ES6 Classes) with LocalStorage for persistent workout data across browser sessions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js (familiar)

Database & Services: Supabase

Programming Languages: JavaScript, TypeScript, Python

Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Netlify

EDUCATION

Bachelor of Engineering – Computer Science & Engineering

2022 – 2026

University College of Engineering, Tindivanam | CGPA: 8.3 / 10

CERTIFICATIONS

- **Data Structures & Algorithms using Python** – NPTEL
- **The Ultimate React Course** – Udemy
- **JavaScript Specialist Certification** – Udemy
- **SQL Certification** – Simplilearn

ADDITIONAL INFORMATION

- Zonal-level Volleyball player — represented college at district competitions.
- Actively participated in and hosted technical events at college level.
- Quick learner with strong attention to detail, team collaboration skills, and a passion for building great user experiences.
